Nuá is the story of a woman turning to death, pestered by evil and wickedness; it is based on a reality experienced by the musician and told as a fairy-tale for being better understood by those people she is trying to involve in true love.

Nuá is alteration of sufferings and troubles in a metaphisical vision through which Nuá finds her real inner ego.

Nuá is a score of subconscious sounds that become creative and visible by means of the research of pure sound, with gesture plots, developed by players, mimes, dance and music.
